Languages: English, Hindi, Gujarati

PROFESSIONAL SUMMARY

Results-driven Senior Mobile Application Developer with 10+ years of extensive experience designing, developing, and deploying high-performance Android and Flutter applications. Expertise in native Android development (Kotlin/Java), cross-platform Flutter development with modern state management (Riverpod, Bloc, Cubit), and clean architecture patterns. Proven track record delivering 30+ scalable mobile applications across diverse industry verticals including social networking, music streaming, e-commerce, healthcare, AR/VR, and AI-powered tools. Strong experience in CI/CD implementation, workflow automation, and leading development teams.

TECHNICAL SKILLS

Mobile Development: Android (Native), Flutter, Dart, Kotlin, Java, Jetpack Compose UI
Architecture & Patterns: MVVM, MVC, MVP, Clean Architecture, Feature-first Architecture
State Management: Riverpod, Bloc, Cubit, GetX, Provider
Backend Integration: RESTful APIs, GraphQL, JSON, XML, Retrofit, Dio, OkHttp, Volley
Database: SQLite, Realm, Room Database, Cloud Firestore
Firebase Services: Authentication, FCM, Analytics, Crashlytics, Realtime Database, Firestore
AI & ML Integration: Google ML Kit, ARCore, Sceneform, Groq API (LLaMA/Whisper), FFmpeg Kit
AR/XR Technologies: Google ARCore, Sceneform, 3D Model Rendering (GLB/GLTF), OpenGL ES 3.0
Libraries & Tools: RxJava, Dagger 2, Navigation Component, EventBus, ButterKnife, CameraX
Payment Integration: In-App Purchases, Multiple Payment Gateways
Analytics & Optimization: Google Analytics, AppsFlyer, Optimizely, SonarQube
Additional Technologies: BLE, Wi-Fi API, ADB Protocol, WebSocket, Speech-to-Text, TTS, Social Media Integration
Workflow Automation: n8n Workflow Automation, Agent-based Development
Development Tools: Android Studio, VS Code, Git, Jira, Figma
DevOps & CI/CD: GitHub Actions, GitLab CI/CD, Firebase App Distribution
Methodologies: Agile/Scrum, Code Reviews, Unit Testing, Integration Testing

PROFESSIONAL EXPERIENCE

Senior Software Engineer *December 2024 – Present*

Gooroo Mobility India Pvt. Ltd. | Ahmedabad, Gujarat

- Leading mobile application development initiatives using Android and Flutter frameworks
- Architecting scalable and maintainable mobile solutions following industry best practices
- Implementing CI/CD pipelines using GitHub Actions for automated build and deployment
- Developing n8n workflow automation for improved development efficiency and team collaboration
- Implementing modern state management solutions (Riverpod, Bloc, Cubit) with clean architecture patterns
- Working with agent-based development approaches for intelligent automation
- Collaborating with cross-functional teams to deliver high-quality mobile applications

Senior Software Engineer *March 2023 – December 2024*

Brainvire Infotech Pvt. Ltd. | Ahmedabad, Gujarat

- Developed and maintained multiple Android and Flutter applications for international clients
- Implemented CI/CD pipelines for automated testing, building, and deployment processes
- Led code review sessions and mentored junior developers on best practices and coding standards

- Implemented Jetpack Compose UI for modern Android application development
- Worked with advanced Flutter state management solutions including Riverpod and Bloc patterns
- Integrated Firebase services, GraphQL APIs, and third-party SDKs to enhance app functionality
- Optimized application performance resulting in improved load times and reduced crash rates
- Participated in sprint planning, daily stand-ups, and agile development processes

Senior Software Engineer *June 2021 – February 2023*

TOPS Infosolutions Pvt. Ltd. | Ahmedabad, Gujarat

- Designed and developed native Android applications using Kotlin and Java
- Implemented MVVM architecture with Android Architecture Components including LiveData and ViewModel
- Integrated In-App Purchase functionality and multiple payment gateway solutions
- Developed real-time chat applications using Cloud Firestore for single and group messaging
- Created hardware-related applications with BLE integration using Estimote and Kontakt IO SDK
- Collaborated with UI/UX designers to implement pixel-perfect Material Design interfaces
- Published multiple applications on Google Play Store with 4+ star ratings

Android Developer *August 2016 – May 2021*

Wedowebapps Pvt. Ltd. | Ahmedabad, Gujarat

- Developed 15+ Android applications across various domains including music, video, e-commerce, and utilities
- Built custom music player, video player, and video editing applications with advanced features
- Implemented social sharing, push notifications, and analytics integration
- Worked with RESTful web services for seamless backend integration
- Performed debugging, testing, and optimization to ensure application quality and stability
- Maintained legacy codebases and migrated applications to modern Android frameworks
- Gained experience in Android smart watch application development

Android Developer *August 2014 – August 2016*

Alakmalak Technologies Pvt. Ltd. | Ahmedabad, Gujarat

- Started career in Android application development using Java and Android SDK
- Developed e-commerce applications with payment gateway integration
- Implemented SQLite database for local data storage and management
- Worked on UI/UX implementation following Material Design guidelines
- Participated in the full software development lifecycle including analysis, design, development, testing, and maintenance
- Collaborated with team members in an agile environment for project delivery

---

KEY PROJECTS

Current Projects

RedCarpetOffice – Smart Office Booking Platform | *Flutter | Dart*

- Built a full-featured office space booking platform connecting vendors and clients with role-based dashboards for both user types
- Integrated Gmail OAuth to scan inbox and auto-detect actionable signals (flights, invoices, hotel, bookings) using a custom keyword classifier
- Developed a rule-based smart suggestion engine cross-referencing calendar events and email signals to surface contextual reminders (trip checklists, invoice alerts, meeting briefs)
- Implemented background sync service, push notifications, and a self-service Privacy Center with data deletion for compliance

Technologies: Flutter, Dart, Riverpod, REST APIs, Gmail API, Google Calendar API, Clean Architecture

GMScan – AI-Powered Document Scanner | *Android | Java*

- Built a multi-type document scanning app supporting General Documents, ID Cards, Business Cards, and Books with dedicated scan flows and Lottie animations

- Integrated CameraX with ML Kit barcode detection and Open Library API to auto-fetch book metadata (title, authors, subjects) from ISBN scans
- Implemented multi-provider authentication (Google, Facebook, Apple, LinkedIn, Dropbox) with OTP verification and forgot-password flow
- Developed a queue-based cloud sync manager using Retrofit with offline-first Room database, folder management, and usage analytics dashboard

Technologies: Java, Android, CameraX, ML Kit, Room Database, Retrofit, Volley, Glide, Lottie

Animal World AR – Educational AR App for Kids | *Android | Java*

- Built an AR educational app using Google ARCore and Sceneform to detect real-world surfaces and place interactive 3D animal models with pinch-to-scale and rotation
- Implemented Android Text-to-Speech to narrate animal names and alphabet characters, with A-Z animal encyclopedia loaded from local JSON assets
- Developed a custom center-snap RecyclerView carousel for AR alphabet browsing and a DrawingView canvas for multilingual character tracing
- Added language selector supporting English, Hindi, Gujarati, Marathi, Kannada, Malayalam, Telugu, and Urdu

Technologies: Java, Android, ARCore, Sceneform, Android TTS, RecyclerView, Lottie, OpenGL ES 3.0

GMI IQ Remote – Universal AI Smart TV Remote | *Flutter | Dart*

- Built a universal smart TV remote integrating 5 TV platforms: Android TV/Google TV, Samsung Tizen, LG webOS, Sony Bravia, and Roku via their native protocols
- Implemented network scanning for auto-discovery of TVs and YouTube Lounge API pairing to detect playing video, title, and playback progress in real time
- Developed voice control with real speech-to-text and keyword-based intent parser for hands-free mode switching (Movie Night, Kids Time, Focus/News)
- Integrated Groq API (LLaMA 3.1) for AI-driven suggestions and ADB-based session monitoring to detect active apps and media state on Android TV

Technologies: Flutter, Dart, Provider, Speech-to-Text, Groq API, YouTube Lounge API, ADB Protocol, WebSocket

Video Editor Studio – AI-Powered Video Editing SDK | *Flutter | Dart*

- Built a professional timeline-based video editing SDK with clip trimming, reordering, split/duplicate, multi-track editing, and Picture-in-Picture (PiP) layer compositing
- Developed 10 AI-powered editing tools using FFmpeg and Google ML Kit: background removal, object removal, auto highlight detection, scene detection, silence removal, smart crop, stabilization, color correction, music ducking, and noise removal
- Integrated Groq Whisper API (whisper-large-v3) for AI-generated subtitles with automatic language detection and translation support across 12 languages
- Implemented animated text/sticker overlay system, volume keyframe audio editor, full undo/redo history, autosave, and MP4 export pipeline via FFmpeg

Technologies: Flutter, Dart, Riverpod, FFmpeg Kit, Groq Whisper API, Google ML Kit, video_player

Previous Projects

QuirkChat – Find Your People | *Android | Kotlin*

- Developed a social networking platform for geek communities and fandom clubs with real-time chat using Cloud Firestore
- Integrated social authentication and FCM push notifications for user engagement

Technologies: Kotlin, MVVM, Firebase, Cloud Firestore, FCM, Material Design
App URL: play.google.com/store/apps/details?id=com.quirktastic

Vibez – African Music Streaming | *Android | Kotlin*

- Built a comprehensive music streaming platform connecting African artists with a global audience
- Implemented ExoPlayer-based media player with playlist management, offline playback, and premium subscription payment gateway

Technologies: Kotlin, ExoPlayer, Retrofit, Room Database, In-App Purchases
App URL: play.google.com/store/apps/details?id=com.ostech.vibez

FM Contractor – Business Management Platform | *Android | Kotlin*

- Developed a business management application for contractors and broker networks with complex business logic for contractor management and network building
- Created an intuitive dashboard with data visualization and reporting features

Technologies: Kotlin, MVVM, Retrofit, Material Design, Google Analytics
App URL: play.google.com/store/apps/details?id=com.contractorfm

Ke Insumos – Agricultural Marketplace | *Flutter | Dart*

- Built an innovative agricultural marketplace with dual user roles, order management for producers and agronomists, and real-time order tracking

Technologies: Flutter, Dart, GetX, Firebase, REST APIs
App URL: play.google.com/store/apps/details?id=com.keinsumos

Main Court – Play Pickleball | *Flutter | iOS & Android*

- Developed a cross-platform app connecting Pickleball enthusiasts with match creation, discovery, joining, skill-based matching, and scheduling

Technologies: Flutter, Dart, Bloc, Firebase, Google Maps API
App URL: apps.apple.com/us/app/main-court-play-pickleball/id6471336853

Dietas Saludables – Health & Fitness | *Android | Java/Kotlin*

- Created a health and fitness app with 30+ diet plans, BMI calculator, and ideal weight calculation algorithm
- Designed a user-friendly interface for diet tracking and meal planning

Technologies: Android, SQLite, Custom UI Components, Material Design
App URL: play.google.com/store/apps/details?id=com.lomasdefrida.dietassaludablesV2

Additional Notable Projects

PIP Car: Picture-in-Picture video player for automotive entertainment. **Access 24:** Healthcare Access and Management Application. **Smoogle (Konnect):** Social connectivity platform. **Cosign:** Digital signature and document management. **HPE:** Horse racing and football tips prediction application. **Hardware Integration Apps:** BLE-based applications using Estimote and Kontakt IO SDK for beacon connectivity.

EDUCATION

Master of Computer Application (MCA) *2011 – 2014*
Shri Jairambhai Patel Institute of Business Management (NICM)

Bachelor of Computer Application (BCA) *2008 – 2011*
Navgujarat College of Computer Applications

PROFESSIONAL ACHIEVEMENTS

- Successfully delivered 30+ mobile applications across Android and Flutter platforms
- Achieved 4+ star ratings on multiple published applications with 100K+ cumulative downloads
- Led development teams and mentored junior developers on modern mobile development practices
- Implemented performance optimizations resulting in improved app ratings and user retention
- Expertise in both native Android and cross-platform Flutter development with AR, AI, and ML integrations
- Built AI-powered features using Groq API, Google ML Kit, ARCore, and FFmpeg for production-grade applications
